

# BOWIE WHITEPAPER

---

## A Culture-First Token on Solana

**Version:** 1.0 **Release Date:** November 15, 2025 **Status:** Public

---

## IMPORTANT DISCLAIMERS

**This whitepaper is for informational purposes only.**

- BOWIE is a **utility and cultural asset**, not an investment product or security.
- **No promise of financial return** is made or implied.
- All tokenomics figures are **illustrative and subject to revision** based on legal and economic review.
- This document does not constitute financial, legal, or investment advice.
- BOWIE does not coordinate price manipulation, pump schemes, or trading operations.
- Participation in the BOWIE ecosystem is at your own risk.

**By reading this document, you acknowledge these disclaimers.**

---

  13. [Contact & Resources](#)
- 

## Executive Summary

**BOWIE** is a culture-first SPL token on Solana designed to fund art, events, and community infrastructure while experimenting with transparent, sovereign-aligned economic structures.

### Key Characteristics

- **Utility-Focused:** Medium of exchange for events, creative work, and community contributions
- **Culture-First:** Rewards creativity and courage, not speculation
- **Transparent Governance:** Public documentation, multisig treasury control, locked token supply

- **Anti-Rug Design:** Revoked mint/freeze authority, time-locked allocations, public wallet mapping
- **Community-Driven:** Evolving from stewardship → multisig → DAO experimentation

## Core Commitments

1. **No Financial Promises:** BOWIE is not marketed as an investment
  2. **Full Transparency:** All major treasury actions documented and public
  3. **Responsible Token Management:** Up to 60% of supply locked with public verification
  4. **Security-First:** Hardware wallets, multisig control, no seed phrase sharing
  5. **Cultural Mission:** Funding real-world experiences, art, and community
- 

## Introduction

The token economy has been dominated by speculation, short-term thinking, and extractive practices. BOWIE represents a different approach: **culture-first economics**.

We believe that tokens can serve as:

- **Coordination mechanisms** for cultural movements
- **Funding vehicles** for art and community infrastructure
- **Signals of belonging** in aligned ecosystems
- **Tools for experimentation** with new governance models

BOWIE exists to explore these possibilities while maintaining transparency, security, and integrity.

## Why Solana?

Solana offers:

- **Low transaction costs** suitable for everyday cultural transactions
  - **High throughput** for event ticketing and merchant acceptance
  - **Mature ecosystem** with proven multisig and security tooling
  - **Strong developer community** for building governance infrastructure
- 

## Vision & Mission

### Vision

Create a culture-first token that rewards creativity and courage while funding real-world experiences and communities.

### Mission

1. **Fund Cultural Initiatives:** Art installations, events, gatherings, creative commissions
  2. **Build Community Infrastructure:** Websites, tools, gathering spaces, educational resources
  3. **Experiment with Governance:** Transparent decision-making, multisig treasuries, DAO evolution
  4. **Demonstrate Sovereignty:** Responsible stewardship, public accountability, anti-rug design
  5. **Create Belonging:** A signal of participation in the BOWIE cultural ecosystem
-

# What BOWIE Is (And Isn't)

## What BOWIE Does

- ✔ **Medium of Exchange** Use BOWIE for event tickets, creative work, and community contributions.
- ✔ **Treasury Funding** Powers grants, gatherings, and infrastructure through transparent treasury management.
- ✔ **Community Signal** Represents belonging and participation in the BOWIE ecosystem.
- ✔ **Governance Participation** Enables input into cultural direction and resource allocation (evolving).
- ✔ **Utility & Access** Unlocks perks, access tiers, and opportunities within aligned venues and collectives.

## What BOWIE Does NOT Do

- ✗ **Promise Financial Returns** BOWIE is not marketed as an investment or wealth-building vehicle.
- ✗ **Coordinate Price Manipulation** No pump schemes, buy-bots, wash trading, or artificial volume.
- ✗ **Sell as Investment Product** BOWIE is a utility token, not a regulated security.
- ✗ **Guarantee Outcomes** All initiatives are experiments; success is not guaranteed.

# Tokenomics

**NOTE:** All numbers are illustrative and subject to refinement with legal and economic advisors.

## Token Specifications

- **Name:** BOWIE
- **Type:** SPL Token (Solana)
- **Total Supply:** 1,000,000,000 BOWIE (illustrative)
- **Mint Authority:** Revoked (planned)
- **Freeze Authority:** Revoked (planned)

## Token Allocation (Illustrative)

Category	% of Supply	Lock Duration	Purpose
Treasury Reserve	20–30%	12 months	Strategic grants, long-term development
Ecosystem Growth	10–15%	6–12 months	Community rewards, bounties, partnerships
Founder Vesting	5–10%	12–24 months	Core contributor alignment
Operational Liquidity	1–5%	Unlocked	Transparent day-to-day operations
Community Distribution	20–25%	Varies	Airdrops, participation rewards

Category	% of Supply	Lock Duration	Purpose
Liquidity & Market Making	10–15%	Varies	DEX liquidity, initial distribution

**Total Locked:** Up to 60% of supply (maximum)

Time-Lock Implementation

After Pump.fun graduation (if applicable), BOWIE implements comprehensive time-locking:

Lock Schedule

Category	Duration	Service	Verification
Treasury Reserve	12 months	SolanaTimeLock (recommended)	Public vault address
Ecosystem Growth	6–12 months	SolanaTimeLock	Public vault address
Founder Vesting	12–24 months	SolanaTimeLock	Public vault address
LP Tokens	9–12 months	SolanaTimeLock	Public lock certificate

Transparency Commitments

All locks will be publicly verified with:

- Transaction hash
- Lock contract link
- Unlock date
- Vault address

Published locations:

- Documentation site
- Governance repository
- Community channels (Telegram, X)
- Tokenomics page

Value Drivers (Utility, Not Speculation)

1. **Event Access:** Tickets, access tiers, perks for BOWIE-aligned gatherings
2. **Creative Commissions:** Payment for artists, creators, contributors
3. **Merchant Acceptance:** Vendor use in aligned venues and collectives
4. **Governance Participation:** Input into cultural direction and treasury allocation
5. **Community Rewards:** Bounties for contributions, moderation, content creation

Best Practices

- **Maximum 60%** of supply locked

- **Maximum 24 months** lock duration
  - **No early unlock** mechanisms (locks are final by design)
  - **Public wallet mapping** for full transparency
  - **Hardware wallets** for high-value vaults recommended
- 

## Governance Model

BOWIE governance evolves through three phases:

### Phase 1: Stewardship (Current)

**Purpose:** Establish foundation, ensure safety, create documentation

**Structure:**

- One primary steward coordinates initial decisions
- Focus on treasury organization, documentation, risk reduction
- No large unilateral treasury moves without written rationale
- All decisions publicly documented

**Duration:** Until multisig infrastructure is operational

### Phase 2: Multisig (Next Stage)

**Purpose:** Distributed control, enhanced security, transparent decision-making

**Structure:**

- **3-of-5 multisig** controls treasury (Squads Protocol or equivalent)
- Tiered approval system based on spend amount:
  - **< \$500:** Steward or Ops Lead approval, publicly logged
  - **\$500–\$5,000:** 2-of-5 multisig approval required
  - **> \$5,000:** 3-of-5 multisig approval + public report

**Key Features:**

- No single key controls treasury
- All proposals documented before execution
- Public transaction logs for significant spends
- Hardware wallets for signers where possible

### Phase 3: Community Governance (Future)

**Purpose:** Broader participation, DAO experimentation, community input

**Structure** (evolving):

- Community proposals from active contributors
- On-chain or off-chain voting (pending legal review)
- Input on budgets, grants, strategic direction
- Formal governance framework and tools

**Principles:**

- Documented
  - Transparent
  - Adaptable
  - Legally compliant
- 

## Treasury Management

### Treasury Purpose

The BOWIE Treasury exists to:

1. Secure long-term cultural and economic stability
2. Fund creative, community, and infrastructure initiatives
3. Provide transparent, accountable stewardship of shared resources
4. Demonstrate responsible, sovereign-aligned financial governance

**The treasury is not a speculative pool for private gain. It is a commons intended to support culture, art, community, and experimentation.**

### Three-Wallet Architecture

#### 1. Treasury Vault (Long-Term Reserve)

- **Purpose:** Strategic initiatives, major grants, long-term development
- **Control:** Highest level of governance protection (multisig)
- **Usage:** Rare, large, well-documented movements only

#### 2. Operations Wallet

- **Purpose:** Day-to-day operational costs
- **Control:** Refilled from Treasury Vault under strict rules
- **Usage:** Small, controlled expenditures (hosting, tools, small bounties)

#### 3. Liquidity Wallet

- **Purpose:** Market liquidity provision
- **Control:** Multisig with specialized parameters
- **Usage:** AMM pools, LP adjustments, liquidity maintenance
- **Prohibition:** Never used for operational or personal spending

**Separation ensures clarity, accountability, and anti-rug credibility.**

### Authorized Uses of Treasury Funds

#### Cultural Initiatives

- Art installations and exhibitions

- Events and gatherings
- Creative commissions and residencies
- Educational or cultural workshops

## Infrastructure

- Website and technical infrastructure
- Multisig and security tooling
- Developer and contributor bounties
- Legal and compliance support

## Community Growth

- Community rewards and airdrops
- Bounties for moderation, content, contributions
- Marketing aligned with culture (not hype manipulation)

## Long-Term Capital Management

- Reserve diversification (SOL, stablecoins)
- Liquidity maintenance and rebalancing

## Explicit Prohibitions

The treasury **may not** be used for:

× Personal enrichment of any single founder or signer × Coordinated pumps, buy bots, or market manipulation × Wash trading or artificial volume × Bribes, coercion, or secret payoffs × Private debt repayment of individuals × Unauthorized "emergency withdrawals" without documentation

**Any breach triggers governance review and potential removal of signers.**

## Transparency Rules

Public disclosure of:

1. **Treasury Addresses:** All wallet addresses with Solscan/SolanaFM links
2. **Monthly Summaries:** Inflows, outflows, and balance changes
3. **Transaction Logs:** Documentation for all significant spends
4. **Governance Decisions:** Rationales for major treasury actions
5. **Budget Proposals:** Pre-funding plans and post-mortems for initiatives

**Governance repository** (GitHub) stores all policies, logs, and documentation.

---

# Technical Architecture

## Blockchain & Token

- **Chain:** Solana
- **Token Standard:** SPL Token

- **Key Security Features:**

- Mint authority revoked (planned, with public proof)
- Freeze authority revoked (planned, with public proof)
- Transparent supply and distribution
- Immutable total supply

## Multisig Infrastructure

- **Platform:** Squads Protocol (or equivalent industry-standard solution)
- **Configuration:** 3-of-5 signature requirement for treasury operations
- **Signer Security:** Hardware wallets (Ledger) recommended for all signers
- **No Seed Phrase Sharing:** Absolute prohibition, zero exceptions

## Time-Lock Implementation

- **Service:** SolanaTimeLock (recommended), Team Finance Solana Locker, or SolanaLocker
- **Verification:** All locks generate public vault addresses and transaction hashes
- **Transparency:** Lock certificates published in documentation and governance repo

## Wallet Structure

```
BOWIE Ecosystem
├── Treasury Vault (Multisig)
│   └── Long-term reserves, major grants
├── Operations Wallet (Controlled)
│   └── Day-to-day expenses, small bounties
├── Liquidity Wallet (Multisig)
│   └── AMM pools, LP management
├── Locked Vaults (Time-Locked)
│   ├── Treasury Reserve Vault (12mo lock)
│   ├── Ecosystem Growth Vault (6-12mo lock)
│   └── Founder Vesting Vault (12-24mo lock)
└── Operational Liquidity (Transparent)
    └── Publicly tracked, not locked
```

## Tooling & Infrastructure

- **Explorers:** Solscan, SolanaFM, Solana Explorer
- **Repository:** GitHub for governance documentation
- **Multisig:** Squads Protocol
- **Time-Locks:** SolanaTimeLock, Team Finance
- **Communication:** Telegram, X (Twitter), documentation site

## Security & Anti-Rug Measures

BOWIE implements comprehensive security measures to prevent rug pulls and ensure long-term credibility.

### 1. Revoked Authorities

✔ **Mint Authority Revoked** No additional tokens can be created after revocation. Transaction proof made public.

✔ **Freeze Authority Revoked** No ability to freeze or disable user wallets. Transaction proof made public.

**Result:** Total supply becomes permanently fixed and immutable.

### 2. Time-Locked Supply

✔ **Up to 60% of supply locked** with public verification ✔ **Lock durations:** 6–24 months depending on category ✔ **LP tokens locked:** 9–12 months (strongest anti-rug signal) ✔ **Public vault addresses:** All locks verifiable on-chain ✔ **No early unlock:** Locks are final and irreversible by design

### 3. Multisig Treasury Control

✔ **3-of-5 multisig** prevents unilateral control ✔ **No single key** can access treasury funds ✔ **Tiered approvals** based on spend amount ✔ **Public documentation** for all significant transactions

### 4. Operational Security

✔ **Hardware wallets** for all signers (recommended) ✔ **No seed phrase sharing** (absolute prohibition) ✔ **Public wallet mapping** for community audit ✔ **Regular security reviews** and external audits (planned)

### 5. Transparency Commitment

✔ **All treasury addresses public** ✔ **Monthly financial reports** ✔ **Transaction logs for major spends** ✔ **Governance decisions documented** ✔ **Budget proposals and post-mortems**

## Security Recommendations for Participants

When interacting with BOWIE:

- Verify token mint address on multiple sources
- Use hardware wallets for significant holdings
- Never share seed phrases or private keys
- Verify all official communications through multiple channels
- Review all lock certificates and vault addresses independently
- Participate in governance discussions and oversight

## Emergency Procedures

### If you mistakenly lock tokens:

- There is **no early unlock** mechanism
- Tokens remain inaccessible until the specified unlock date
- Contact lock service only for UI/technical errors

**Locks are final by design** to ensure credibility and prevent manipulation.

---

## Roadmap

BOWIE's development follows a phased, adaptive approach.

### Phase 1: Foundation (Current)

**Timeline:** Q4 2025

**Goals:**

-  Canonical documentation (governance repo)
-  Public articulation of vision and principles
-  Initial treasury and wallet separation
- ⌚ Whitepaper release
- ⌚ Community formation

**Deliverables:**

- Complete governance documentation
- Treasury Charter and Governance Model
- Technical specifications
- Whitepaper (this document)

### Phase 2: Infrastructure (Q1 2026)

**Goals:**

- Multisig setup on Solana (Squads Protocol)
- Tokenomics refinement with legal and economic advisors
- Mint/freeze authority revocation with public proof
- Time-lock implementation for allocated supply
- First small cultural grants and experiments

**Deliverables:**

- Operational 3-of-5 multisig
- Public wallet mapping
- Lock certificates and vault addresses
- Initial grant recipients and case studies

### Phase 3: Expansion (Q2-Q3 2026)

**Goals:**

- Merchant acceptance pilots (venues, events, creators)
- Recurring BOWIE-linked events and gatherings
- Contributor and bounty programs
- Community growth initiatives

- Documentation site launch

#### **Deliverables:**

- 3+ merchant acceptance partnerships
- Quarterly cultural events
- Active contributor community
- Public-facing documentation site

### Phase 4: Governance Evolution (Q4 2026+)

#### **Goals:**

- Community proposal mechanisms
- DAO / governance tooling experiments
- Ongoing refinement of treasury rules
- Expanded multisig or governance structures
- Long-term sustainability model

#### **Deliverables:**

- Community governance framework
- Proposal and voting infrastructure
- Formal DAO structure (if legally viable)
- Multi-year treasury sustainability plan

**Note:** This roadmap is directional and will evolve based on real-world feedback, legal guidance, and community input.

---

## Cultural Philosophy

BOWIE is guided by a set of cultural principles that inform all decisions.

### Sovereign Protocols

#### **Core Beliefs:**

1. **Sovereignty = Responsibility + Ownership of Consequences** We take full responsibility for our decisions and their outcomes.
2. **Transparency = A Form of Respect** Open communication and public documentation honor our community.
3. **No One "Owns" the Treasury** The treasury exists for the mission, not private enrichment.
4. **Trust is Earned by Repeated Integrity** We build credibility through consistent, principled action.
5. **Community Capital Must Serve Community Benefit** Resources are deployed for collective flourishing, not extraction.

### Non-Negotiable Rules

- **No seed phrase sharing**, ever
- **No coordinated pump operations** or buy-bots
- **No guarantees of profit** or "you will be rich" claims
- **All major treasury actions** must be documented and publicly explainable
- **No market manipulation**, wash trading, or artificial volume

## Cultural Values

- **Creativity over Speculation**: Reward artists, builders, contributors
  - **Courage over Hype**: Support bold experiments, not pump campaigns
  - **Community over Extraction**: Shared benefit over private gain
  - **Transparency over Opacity**: Open books, public decisions
  - **Long-Term over Short-Term**: Sustainable cultural infrastructure, not quick flips
- 

## Legal & Compliance

### Legal Structure (Planned)

Subject to legal counsel, BOWIE may establish:

- **Primary Holding Company**: For general operations
- **Subsidiary Entity**: "BOWIE Cultural Treasury Ltd." or similar
  - Isolates token-related risks and obligations
  - Provides clean structure for contracts and grants
  - Enables clearer accounting and auditing
  - Protects individuals and parent entity

### Regulatory Compliance

BOWIE commits to:

- **Legal Review**: All major decisions reviewed by qualified counsel
- **Regulatory Monitoring**: Ongoing assessment of evolving regulations
- **Conservative Approach**: When uncertain, err on side of caution
- **No Security Claims**: BOWIE is not marketed as a security or investment
- **Utility Focus**: Emphasis on cultural use cases, not financial returns

### Tax & Accounting

- Proper accounting for all treasury transactions
- Tax guidance for treasury operations and distributions
- Potential external audit (as project scales)
- Clear records for regulatory compliance

### Geographic Considerations

BOWIE does not make claims about regulatory status in any specific jurisdiction. Participants are responsible for understanding their own local regulations regarding digital assets.

# Contact & Resources

## Official Channels

- **Documentation:** [To be announced]
- **Governance Repository:** GitHub (public)
- **Community:** Telegram [To be announced]
- **Social:** X (Twitter) [To be announced]

## For Inquiries

- **General Questions:** [Contact to be announced]
- **Partnership Proposals:** [Contact to be announced]
- **Media Inquiries:** [Contact to be announced]
- **Security Issues:** [Security contact to be announced]

## External Resources

- **Solana Documentation:** <https://docs.solana.com>
- **Squads Protocol:** <https://squads.so>
- **SolanaTimeLock:** <https://solanatimelock.app>
- **Solscan Explorer:** <https://solscan.io>

---

# Conclusion

BOWIE represents an experiment in culture-first token economics. We believe that transparent governance, responsible token management, and genuine cultural mission can coexist with the energy and innovation of the Solana ecosystem.

This is not a promise of wealth or guaranteed success. It is an invitation to participate in building something meaningful: a community-funded cultural infrastructure that rewards creativity, courage, and contribution.

**We build in public. We govern transparently. We take responsibility for our actions.**

If these values resonate with you, we invite you to join us.
